Hazard and vulnerability assessment - risk analysis - disaster prevention and mitigation - relief aid

## Qualified expertise for quality services

ECO is among Germany's leading international consultants for socio-ecological programme advice in official development assistance.

We work to promote sustainable livelihoods and alleviate poverty. Founded in the year of the UN Rio Summit, in 1992, ECO has since contributed to over 250 projects of natural resources management and social development worldwide.

Building on extensive expertise in good governance and capacity building, ECO helps design and implement national rural development and poverty reduction strategies and assists in multilateral environmental policy development. Supportive activities relate to education, tourism and media.

ECO's independent technical expertise is continually informed by hands-on project management: Since 1992, ECO has been entrusted with 30 long-term projects in developing countries and countries in transition. For evaluations and project management, ECO is a long-standing framework contractor to the European Commission.

ECO relies on regional experience, on logistical, economic and manage-

ment skills and intercultural competence. Emphasis is put on working relationships with national partners.

ECO is renowned for its technical capacities and innovative conceptual work as well as for the quality of its administrative and financial management of commissions.

ECO's regional focus is on Sub-Saharan Africa and the Maghreb. Other important markets have emerged in South East and Central Asia, the Pacific, Central and South America and the European countries in transition.

Would you like any further information? Our secretary Ms. Heussner is pleased to assist. Or use the address panel overleaf to contact us directly.

## ECO CONSULTING GROUP

Socio-ecological consulting services  
 in international development

The ECO CONSULTING GROUP provides integrated solutions for the sustainable management of natural resources, and education, worldwide. Combining human and natural resources for rational development, our services are process-oriented and based on partnership, participation, institutional pluralism and subsidiarity. Since 1992, the ECO CONSULTING GROUP has worked in over 90 countries. Our clients are public governmental and non-governmental organizations and private enterprises. Our professional staff of foresters, sociologists, geographers, agronomists, economists, education and communication experts has made ECO one of Germany's strongest consultancies in the sector. With several subsidiary branches and access to local networks in our partner countries the ECO CONSULTING GROUP is your unique resource base for cooperation.
