

Fields of expertise

Policy and strategy development for the education sector (sector wide approach)

Strengthening of the sector administration (including support to decentralised structures and other stakeholders)

Reform of curricula, development of modules and courses for formal and non-formal education

Training of teachers, trainers and staff in the education sector, organisations, projects and services as well as staff of organisations

Development, production and introduction of teaching and learning material

Implementation and impact monitoring, evaluation of existing systems and programmes

Information and communication: strategic planning and design of awareness raising and information campaigns, print and online publications

Education for Self-determined Development

ECO Education offers advice to Governments and organisations all over the world on the definition, implementation and appreciation of educational policy options and identified programmes and projects.

We understand „education for all“ and „lifelong learning“ in the sense of a holistic approach of „human resources development“ (HRD). HRD extends to formal and non-formal basic education, to the educational services of the secondary and tertiary sector, to all kinds of developing practical skills, to adult teaching and extension for professionals and all intersecting activities.

Development for education today increasingly supports the development of education systems in our partner countries. Education is one of the fundamentals for economic development; at the same time it can enhance the self-determined socio-cultural development towards a democratic commonwealth.

ECO Education builds on more than 20 years of experience of its members and staff. We profit from a dense network of specialists and partners and we work in interdisci-

plinary teams with local and international experts.

Our services address all areas of an education system development as well as the implementation and assessment of programmes in our partner countries. Our regional concentration is in sub-Saharan Africa, South- and South-East Asia.

ECO Education observes the working principles and quality standards of **ECO Consulting Group** as a whole. As need arises we can draw on in-house staff resources in many further related technical disciplines.

Please feel welcome to visit our website or contact us directly by e-mail or postal address (overleaf).

ECO Education

Consulting services
in the education sector
in international cooperation

ECO Education is a German-based consultancy working in the field of international development cooperation. **ECO Education** was created in 2003 as joint venture; it unites the competencies of two existing consultancy firms: BTB Jürgen Buchholz, Beratung & Training, on one hand, and ECO Consult Sepp & Busacker Partnerschaft with offices in Oberaula and Frankfurt, on the other.
